

SERIES 2000 Rigid Dock Shelter

- **DYNALON®** Fairborn's exclusive fabric with the ultimate in tear and abrasion resistance and superior weatherability
- **DYNA-ARMOR®** Overlapping, durable fabric panels at critical wear areas of head curtain
- **BOTTOM REINFORCEMENTS** 2-Ply fabric layer provides extra wear protection on lower area of side curtains (Optional 3-Ply)
- **GUIDE STRIPE** Highly visible yellow strip facilitates accurate truck positioning
- **FLEXIBLE STAYS** 3-M Scotch Ply™ Stays enable top and side curtains to firmly "hug" truck body (Optional "Z" pattern at side curtain top)
- **REINFORCEMENT SLEEVES** Multi-ply, fabric stay encasements ensure cover longevity
- **FOAM BEADS** Compressible, soft cord in curtain edges conforms to truck body irregularities
- **THREAD** Bonded, high tensile, multi-cord polyester using lockstitch and backtack sewing technique throughout
- **FRAME** Select, kiln-dried, factory painted wood assembled with screw shank nails and countersunk lag screws yielding superior structural integrity (Optional steel frame)

- **RAKED HEADER** 2" x 6" peaked at center provides adequate drainage (Optional flat header for low clearance)
- **FIBERGLASS** Translucent panels permit natural light penetration through top and side members. Secured to frame with 1" wide, adhesive tipped, steel staples
- **ALUMINUM TRIM** Polished angle perfects corner appearance
- **BOTTOM PADS** Covered foam cushions prevent bottom corner air filtration and complete the shelter enclosure
- **WIND STRAPS** Protects head curtain from wind uplift damage
- **TENSION CORD** Maintains upper side curtain stability

- **STEEL GUARDS** Factory painted, structural steel channel configurations prevent damage from misaligned trucks
