

PHARMA-VISION® SWING

H I G H P E R F O R M A N C E S W I N G I N G G L A S S D O O R

A Full Vision Door Option

Rytec Corporation announces the addition of cGMP Pharma-Vision® glass doors to its line of rolling, sliding and swinging Pharma-Doors™. The doors premiered at Interphex New York, April 24-26, 2007, where exhibitors and attendees saw the glass interior entrance solution for pharmaceutical, biopharmaceutical, nutraceutical and research labs.

Shown with optional side light.

Full Vision - The glass door visually opens up the space giving a sight-line for the entire room and provides a streamlined look for interior areas.

Tempered Glass Panels - The panels are heat treated to increase the strength of the door and available up to 1/2" thick. Glass panels provide borrowed light from the hallway.

Eliminates Gowning - Full vision eliminates the necessity to gown clients for tours of production areas.

Economical - Glass doors are an affordable option where full vision, easy cleaning and high tolerance to chemical wipe downs are required.

Easy to Clean - Smooth surface makes it easy to clean with standard glass cleaners.

Seals - Optional leading edge, bottom, head and jamb seals provide tight, effective, full-perimeter closure.

Auto Operation - Automatic swing door options available.

Models - Single swing glass door, pair of swinging glass doors, single slide glass door, biparting sliding glass doors.
